KENGOLD

The next generation of CVD coating technologies featuring uniform layers that resist abrasion, provide a strong thermal barrier, improve edge toughness, and allow for easy detection of wear due to its gold flank.

Predictable performance turn after turn

Easy wear identification to reduce waste of unused edges

Increases accuracy and output rate reliability, and delivers consistent tool life

- 1** **Machining Operation —**
for what the insert geometry is designed

2 **Chip Control Geometry Designation —**
example: MG-MV = CNMG-120408MV

3 **Primary Workpiece Material Group**

4 **Chipbreaker Geometry —**
section is through nose radius of insert

5 **Feed Rate Range —**
for best results, use the center 60% of the range

6 **Depth-of-Cut Range —**
for all inserts in the program, select smaller inserts for lighter cuts and larger inserts for heavy cuts
