TECHNIK FÜR GEWINDE

## **UNSER UNTERNEHMEN**

Wir sind ein dynamisches, familienfreundliches Unternehmen in Baden-Württemberg. Seit 1947 entwickeln, vertreiben und produzieren wir qualitativ hochwertige Gewindewerkzeuge für den nationalen und internationalen Markt. Für unsere Kunden sind wir der Spezialist und Partner für leistungsstarke, effiziente und prozesssichere Innengewindebearbeitungen. Hohe Kundenzufriedenheit in Verbindung mit hoher Qualität ist unsere oberste Maxime.

## **OUR COMPANY**

We are a dynamic, medium-sized family-friendly company which has its place of business in Southern Germany. We are producing high quality threading tools for national and international markets at our location in Niederstetten since 1947. For our customers we are the specialist and partner for high-performance, efficient and reliable thread machining. Our dictum is a high customer satisfaction in combination with high-quality service and products.

## **NOTRE ENTREPRISE**

Nous sommes une dynamique, de taille moyenne, dont le siège social et l'usine se trouvent dans le sud de l'Allemagne. Depuis 1947, nous développons, produisons et commercialisons des outils de filetage de haute qualité pour le monde entier. Nous sommes reconnus par nos clients comme le partenaire spécialisé dans l'usinage de filetages intérieurs performants, efficaces et fiables. Notre devise est la satisfaction élevée du client combinée à un service et des produits de haute qualité.

## **LA NOSTRA AZIENDA**

Siamo un'azienda dinamica del Baden-Württemberg. Dal 1947 sviluppiamo, distribuiamo e produciamo maschi per la filettatura di alta qualità per il mercato nazionale e internazionale. Per i nostri clienti siamo specialisti e partner per prestazioni elevate, efficienza e affidabilità dei processi nella lavorazione della filettatura interna. La nostra assoluta priorità è l'alta soddisfazione del cliente, unita alla massima qualità.

## **NUESTRA EMPRESA**

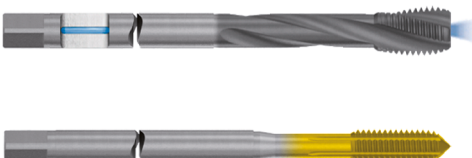

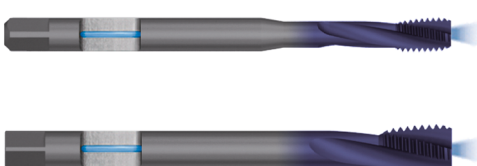

Somos una dinámica, de tamaño medio, que tiene su sede en el sur de Alemania. Fabricamos herramientas de roscado de gran calidad para los mercados nacionales e internacionales en nuestras instalaciones de Niederstetten desde 1947. Para nuestros clientes somos los especialistas y socios para el mecanizado eficiente y fiable de roscas de alto rendimiento. Nuestra máxima es la satisfacción del cliente en combinación con un servicio eficiente y productos de gran calidad.

## Gewindebohrer

machine taps / tarauds machine / maschi a macchina / machos para roscado a máquina

### VARIANT®

» gerade Nuten mit Schälanschnitt  
» Anschnittform B / 3 - 5,5 Gänge

» für Durchgangslochgewinde  
» Spanabfuhr erfolgt in Vorschubrichtung

» straight flutes and spiral point  
» chamfer form B / 3 - 5,5 threads

» for through hole  
» chip evacuation forwards

» goujures droites, coupe GUN  
» entrée B / 3 - 5,5 filets

» pour trous débouchants  
» évacuation des copeaux dans le sens de l'avance

» scanalature diritte con imbocco corretto  
» imbocco forma B / 3 - 5,5 filetti

» per foro passante  
» evacuazione truciolo nel senso di avanzamento

» ranuras rectas y entrada helicoidal  
» entrada forma B / 3 - 5,5 hilos de rosca

» para agujero pasante  
» evacuación hacia adelante de la viruta

### VARIO®

» gerade Spannuten  
» Anschnittform C / 2 - 3 Gänge  
» Anschnittform E / 1,5 - 2 Gänge

» für Durchgangs- und Sacklochgewinde  
» für kurzspanende Werkstoffe  
» Späne werden in den Nuten aufgenommen

» straight flutes  
» chamfer form C / 2 - 3 threads  
» chamfer form E / 1,5 - 2 threads

» for through and blinde hole  
» for short-chipping materials  
» flutes pick up the chips

» goujures droites  
» entrée C / 2 - 3 filets  
» entrée E / 1,5 - 2 filets

» pour trous débouchants et borgnes  
» pour matières à copeaux courts  
» les copeaux remontent dans les goujures

» scanalature diritte  
» imbocco forma C / 2 - 3 filetti  
» imbocco forma E / 1,5 - 2 filetti

» per foro passante e foro cieco  
» per materiali a truciolo corto  
» il truciolo resta nelle scanalature

» ranuras rectas  
» entrada forma C / 2 - 3 hilos de rosca  
» entrada forma E / 1,5 - 2 hilos de rosca

» para agujero ciego y agujero pasante  
» para materiales de viruta corta  
» evacuación de viruta para las ranuras

### AVANT®

» 12 - 25° rechtsgedrallte Spannuten  
» Anschnittform C / 2 - 3 Gänge  
» Anschnittform E / 1,5 - 2 Gänge

» für Sacklochgewinde bis 2,5xd Gewindetiefe  
» Spanabfuhr erfolgt in Schafrichtung

» spiral flute 12 - 25°  
» chamfer form C / 2 - 3 threads  
» chamfer form E / 1,5 - 2 threads

» for blind hole, thread depth up to 2,5xd  
» chip evacuation backwards

» goujures hélicoïdales 12 - 25°  
» entrée C / 2 - 3 filets  
» entrée E / 1,5 - 2 filets

» pour trous borgnes, jusqu'à 2,5xd  
» évacuation des copeaux vers la queue

» elica destra 12 - 25°  
» imbocco forma C / 2 - 3 filetti  
» imbocco forma E / 1,5 - 2 filetti

» per foro cieco fino a 2,5xd  
» evacuazione truciolo verso il gambo

» hélice a derecha 12 - 25°  
» entrada forma C / 2 - 3 hilos de rosca  
» entrada forma E / 1,5 - 2 hilos de rosca

» para agujero ciego, profundidad de rosca hasta 2,5xd  
» evacuación hacia atrás de la viruta

### DOMINANT®

» 38 - 45° rechtsgedrallte Spannuten  
» Anschnittform C / 2 - 3 Gänge  
» Anschnittform E / 1,5 - 2 Gänge

» für Sacklochgewinde bis 3xd Gewindetiefe  
» Spanabfuhr erfolgt in Schafrichtung

» spiral flute 38 - 45°  
» chamfer form C / 2 - 3 threads  
» chamfer form E / 1,5 - 2 threads

» for blind hole, thread depth up to 3xd  
» chip evacuation backwards

» goujures hélicoïdales 38 - 45°  
» entrée C / 2 - 3 filets  
» entrée E / 1,5 - 2 filets

» pour trous borgnes jusqu'à 3xd  
» évacuation des copeaux vers la queue

» elica destra 38 - 45°  
» imbocco forma C / 2 - 3 filetti  
» imbocco forma E / 1,5 - 2 filetti

» per foro cieco fino a 3xd  
» evacuazione truciolo verso il gambo

» hélice a derecha 38 - 45°  
» entrada forma C / 2 - 3 hilos de rosca  
» entrada forma E / 1,5 - 2 hilos de rosca

» para agujero ciego, profundidad de rosca hasta 3xd  
» evacuación hacia atrás de la viruta

## Werkstoff

materials / matières / materiali / materiales

### HSSE-PM

Pulvermetallurgischer Schnellarbeitsstahl / powder metal / acier fritté / acciaio super rapido in polvere / acero rápido sinterizado

### VHM

Vollhartmetall / made of solid carbide / carbure monobloc / in metallo duro / de metal duro

## Sonstige Kurzbezeichnungen

## Bohrlocharten

types of bore holes / types d'avant trous / tipo di foro e filetto / tipos de agujeros taladrados

**für Durchgangslöcher (Anschnittform B)**  
for through holes (chamfer form B)  
pour trous débouchants (entrée B)  
per fori passanti (forma B)  
para agujeros pasantes (forma de entrada B)

**für Sacklöcher mit normalen Gewindeauslauf (Anschnittform C)**  
for blind holes with normal thread chamfer (chamfer form C)  
pour trous borgnes avec une entrée standard (entrée C)  
per fori ciechi con filettatura normale (forma C)  
para agujeros ciegos con entrada de rosca normal (forma de entrada C)

**für Sacklöcher mit kurzem Gewindeauslauf (Anschnittform E)**  
for blind holes with short thread chamfer (chamfer form E)  
pour trous borgnes avec une entrée courte (entrée E)  
per fori ciechi con filettatura corta (forma E)  
para agujeros ciegos con entrada de rosca corta (forma de entrada E)

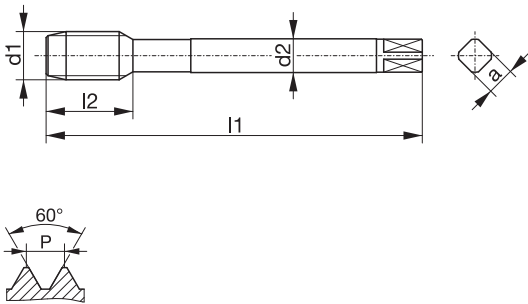

**für Durchgangslöcher und für Sacklöcher mit normalen Gewindeauslauf (Anschnittform C)**  
for through and blind holes with normal thread chamfer (chamfer form C)  
pour trous borgnes et débouchants avec une entrée standard (entrée C)  
per fori passanti e per fori ciechi con normale filettatura (forma C)  
para agujeros pasantes y ciegos con entrada de rosca normal (forma de entrada C)

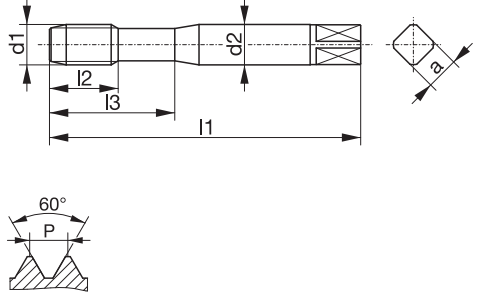

**für Durchgangslöcher und für Sacklöcher mit kurzem Gewindeauslauf (Anschnittform E)**  
for through and blind holes with short thread chamfer (chamfer form E)  
pour trous borgnes et débouchants avec une entrée courte (entrée E)  
per fori passanti e per fori ciechi con filettatura corta (forma E)  
para agujeros pasantes y ciegos con entrada de rosca corta (forma de entrada E)

A close-up photograph of a Duramax N Tin drill bit. The bit is primarily yellow-gold in color, with a silver-colored metal section at the top. It is positioned vertically, with its tip resting on a light-colored metal surface. A green rectangular text box is overlaid on the left side of the image, containing the product name and its description in multiple languages. The background is a blurred metal surface.

Lieferumfang inklusive Spannmutter. Spannschlüsselsatz, Spannzange und Dichtscheibe separat bestellen.

Sonderausführungen unserer Gewindeschneidfutter und anderes Zubehör, sowie weiterführende Informationen erhalten Sie auf Anfrage bei unserem Vertriebsteam.

C = Druck

T = Zug

Während der Bearbeitung dringen Verunreinigungen in die Gewindeschneidfutter ein und können deren Funktion stark beeinträchtigen. Um dem entgegenzuwirken ist eine regelmäßige Reinigung erforderlich. Im Unterschied zu vielen Wettbewerbsprodukten, welche bei Temperaturen über 60 °C beschädigt werden und damit unzureichend waschbar sind, hält das HST SYNCHRO 80 °C stand und kann vollständig gereinigt werden.

Clamping nut is included in delivery. Wrench, collet and sealing disk have to be ordered separately.

Are you interested in special models of our tap holders and other accessories or do you seek further information? Please contact our sales team. We will be glad to assist you.

C = compression

T = tension

During the tapping process, contaminants get into the tap holder and can therefore strongly affect its functioning. To counteract this, a regular cleaning is required. Unlike many competitive products which are damaged at temperatures above 60 °C and which are therefore insufficiently washable, the HST SYNCHRO withstands temperatures of up to 80 °C and can be completely cleaned.

L'écrou est compris dans la fourniture. Clés, pince et disque d'étanchéité sont à commander séparément.

Mandrins spéciaux et autres accessoires sur demande.

C = compression

T = traction

Pendant le processus de taraudage, des particules pénètrent dans le mandrin et peuvent fortement affecter son fonctionnement. Pour contrer ce phénomène, un nettoyage régulier et efficace est nécessaire. De nombreux produits concurrents n'acceptent pas de températures supérieures à 60 °C et le lavage n'est de ce fait pas suffisamment efficace. Contrairement à ces derniers, le mandrin HST SYNCHRO résiste à des températures allant jusqu'à 80°C et peut donc être nettoyé de manière optimale.

La fornitura comprende la ghiera di serraggio. Set di chiave di serraggio, pinza e dischi di tenuta devono essere ordinati a parte.

Siete interessati a maschiatori speciali o ad altri accessori oppure ad ulteriori informazioni? Vi preghiamo di contattare il ns. ufficio vendite. Vi daremo assistenza.

C = compressione

T = trazione

Durante la lavorazione le impurità penetrano nei mandrini di maschiatura e possono comprometterne gravemente il funzionamento. Per contrastare questo fenomeno, è necessaria una pulizia regolare. A differenza di molti prodotti della concorrenza, che si danneggiano a temperature superiori a 60 °C e non sono quindi sufficientemente lavabili, HST SYNCHRO resiste a 80 °C e può essere completamente pulito.

La tuerca de apriete viene incluida con el mandril. Las llaves de apriete, la pinza de apriete y el disco de estanqueidad no son incluidos en la entrega.

Para ofertas de mandriles especiales y otros accesorios o para obtener más información consulten su contacto en el servicio de ventas. Estaremos encantados de atenderles.

C = compresión

T = tracción

Durante el proceso de roscado, la suciedad se introduce en el amarre del macho y esto puede afectar gravemente a su funcionamiento. Para contrarrestar esto, se requiere una limpieza regular. A diferencia de muchos productos de la competencia, que se dañan a temperaturas superiores a 60 °C y que, por lo tanto, no son lo suficientemente lavables, el macho HST SYNCHRO soporta temperaturas de hasta 80 °C y se puede limpiar por completo.

| <p><b>Unser Gewindeschneidfutter mit Schnellwechselsystem. Durch das HST SYNCHRO QCA werden beim Werkzeugwechsel in der Maschine keine Hilfsmittel wie z. B. Spannschlüssel mehr benötigt. Bei Einsatz von handelsüblichen Schnellwechseleinsätzen ergibt sich ein großes radiales Spiel zwischen Gewindeschneidfutter und Schnellwechseleinsatz, welches die Funktion des Futters stark beeinträchtigt. Durch den speziell für die Verwendung im HST SYNCHRO entwickelten QCA Schnellwechseleinsatz wird das Spiel auf ein Minimum reduziert. Somit ist die Funktionsfähigkeit wieder hergestellt.</b></p> <p>Our tap holder with quick change system. The HST SYNCHRO QCA allows tool change in the machine without using wrenches. Conventional quick change systems have large radial play between tap holder and quick change adapter, which affects the functioning of the tap holder significantly. The QCA quick change adapter was especially designed for the use in the HST SYNCHRO tap holder. Reducing the play to a minimum, it guarantees reliable functioning. /</p> <p>Mandrin de taraudage avec attache rapide permettant un changement d'outils sans clé de serrage ni autre dispositif. L'ensemble HST SYNCHRO + attache rapide QCA sont étudiés pour une utilisation optimale et un jeu minimal contrairement aux attaches rapides conventionnelles, dont le jeu radial avec le mandrin est trop important pour permettre de stabiliser l'opération de taraudage. /</p> <p>I maschiatori a cambio rapido HST SYNCHRO QCA permettono di cambiare gli utensili senza utilizzare chiavi. Rispetto ai maschiatori tradizionali non hanno praticamente gioco radiale migliorando così la funzionalità. L'inserzione a rapido QCA è stata studiata per eliminare giochi assiali garantendo una perfetta ripetibilità. /</p> <p>Nuestro portamachos con sistema de cambio rápido. El portamachos HST SYNCHRO QCA permite cambiar la herramienta en la máquina sin utilizar ninguna llave. Los sistemas de cambio rápido convencionales tienen un gran juego radial entre el portamachos y el adaptador de cambio rápido, lo que afecta significativamente al funcionamiento del portamachos. El adaptador de cambio rápido QCA está diseñado especialmente para utilizarlo con los portamachos HST SYNCHRO. Reduciendo el juego al mínimo, y garantizando un funcionamiento fiable.</p> <p><b>Zylinderschaft DIN 1835 B/E</b><br/>straight shank DIN 1835 B/E /<br/>queue cylindrique DIN 1835 B/E /<br/>gambo cilindrico DIN 1835 B/E /<br/>mango cilindrico DIN 1835 B/E</p> <p><b>Werkzeugwechsel auf der Maschine ohne Schraubenschlüssel</b><br/>tool change on the machine without wrench /<br/>changement d'outil sur machine sans clé de serrage /<br/>cambio utensile in macchina senza chiave /<br/>cambio de herramienta en la máquina sin llave</p> <p><b>Abmessungsbereich von M4 bis M16</b><br/>range of dimensions from M4 to M16 /<br/>plage de taraudage M4 à M16 /<br/>capacità di maschiatura da M4 a M16 /<br/>rango de rosca de M4 a M16</p>   |  |

**Gewindebohrzange mit Innenvierkant - ohne Längenausgleich nach DIN ISO 15488**

collet with inner square - without length compensation - DIN ISO 15488 / pince de taraudage avec carré d'entraînement - sans compensation de longueur - DIN ISO 15488 / pinze con quadro - senza compensazione - DIN ISO 15488 / pinza de apriete con cuadrado interior - sin compensación axial - DIN ISO 15488

**für die sichere Aufnahme des Gewindewerkzeugs. Durch den Innenvierkant in der Spannzange wird mit dem Vierkant des Gewindewerkzeugs eine formschlüssige Verbindung erzeugt, welche die Drehmomentübertragung gewährleistet.**

for the secure holding of threading tools. The internal square of the collet and the square at the threading tool's shank create a positive fitting that guarantees torque transmission. /

les pinces avec carré garantissent le centrage et l'alignement du taraud, ainsi que la transmission positive du couple de taraudage. /

permettono un bloccaggio ottimale del maschio. Il quadro della pinza ed il quadro del maschio creano un accoppiamento di forma positivo che garantisce un'ottima trasmissione del momento torcente. /

para la sujeción segura de las herramientas de roscado. El cuadradillo interno de la pinza y el cuadradillo del amarre de la herramienta de roscado crean un ajuste positivo que garantiza la transmisión del par.

**Kühlscheibe für Spannmutter nach DIN ISO 15488 mit innerer Kühlmittelzufuhr**

cooling disk for clamping nut DIN ISO 15488 for internal coolant / disque d'arrosage pour écrou de serrage DIN ISO 15488 avec lubrification interne / disco per lubrificazione assiale per ghiera di serraggio DIN ISO 15488 con lubrificazione interna / disco de refrigeración para tuerca de apriete DIN ISO 15488 para refrigeración interior

**für die verbesserte Kühlmittelzufuhr entlang des Schaftes. Bei der Bearbeitung von Durchgangs- und Sackloch mit einem Werkzeug erhöht der Einsatz eines Sacklochwerkzeuges mit axialer Kühlmittelzufuhr in Kombination mit einer Kühlscheibe die Prozesssicherheit. Für die Durchgangslochbearbeitung wird ein Gewindewerkzeug ohne innere Kühlmittelzufuhr empfohlen.**

for improved lubrication along the shank. When tapping through and blind holes, the process security can be increased by using a blind hole tap with coolant bore combined with a cooling disk. For simple through hole machining, we recommend to combine the cooling disk with a spiral pointed tap without internal coolant. /

pour guider le lubrifiant le long de la queue. Combiné avec un outil standard pour trou borgne avec lubrification interne axiale, il autorise le taraudage en trou borgne et en trou débouchant avec un taraud unique. Pour l'usinage de trous débouchants seuls, il est recommandé d'utiliser un outil sans trou d'huile. /

per migliorare la lubrificazione lungo il gambo dei maschi. Nella lavorazione dei fori passanti e ciechi con un maschio, l'uso di un maschio per fori ciechi con lubrificazione interna assiale in combinazione con un disco di lubrificazione aumentano la sicurezza di processo. Per la lavorazione dei fori passanti viene usato un maschio senza lubrificazione interna. /

para mejorar la lubricación a lo largo del amarre. Al roscar agujeros ciegos y pasantes, la seguridad del proceso se puede aumentar utilizando un macho de roscar para agujeros ciegos con orificio de refrigeración combinado con un disco de refrigeración. Para el mecanizado sencillo de agujeros pasantes, recomendamos combinar el disco de refrigeración con un macho con punta en espiral y sin refrigeración interna.

**Spannmutter DIN ISO 15488 für innere Kühlmittelzufuhr**

clamping nut DIN ISO 15488 for internal coolant / écrou de serrage DIN ISO 15488 pour lubrification interne /  
ghiera di serraggio DIN ISO 15488 per lubrificazione interna / tuerca de apriete DIN ISO 15488 para refrigeración interior

zum einfachen Schließen und Ausbau von Spannzange und Gewindewerkzeug. Das Anziehen der Spannmutter mit montierter Spannzange drückt letztere in die konische Aufnahme im HST SYNCHRO. Die Spannzange schließt sich und hält das Werkzeug sicher in Position. Eine spezielle Innenkontur der Spannmutter ermöglicht ein schnelles und leichtes Entnehmen von Spannzange inklusive Werkzeug. Die Spannmutter von BASS sind für die innere Kühlmittelzufuhr geeignet und nehmen Dicht- bzw. Kühlscheibe auf.

for easy assembly of collet and threading tool. The tightening of the clamping nut pushes the collet into the tapered socket in the HST SYNCHRO. The collet closes, tightly fixing the threading tool. The special internal contour of the clamping nut enables quick and easy disassembly of collet and threading tool. BASS clamping nuts are suitable for internal coolant and can be used with sealing or cooling disks. /

pour montage et démontage simples de la pince et de l'outil. Lorsqu'on visse l'écrou après l'avoir assemblé avec la pince, cette dernière exerce une pression et se cale dans l'attachement conique du mandrin HST SYNCHRO. La pince se ferme et maintient l'outil dans cette position. Le profil intérieur de l'écrou permet d'extraire la pince et l'outil de façon simple et rapide. Les écrous de serrage BASS conviennent pour lubrification interne, pour disques d'étanchéité et d'arrosage. /

per un facile montaggio del maschio e pinza. Avvitando la ghiera si spinge la pinza nella sede conica del mandrino bloccando così l'utensile. Un'unguia nella pinza permette durante lo svitaggio l'estrazione della pinza. Le ghiera BASS sono utilizzabili con lubrificazione interna utilizzando il disco di tenuta. /

para facilitar el montaje de la pinza y la herramienta de roscado. Al apretar la tuerca de sujeción, empuja la pinza dentro del casquillo cónico en el HST SYNCHRO. La pinza se cierra, fijando firmemente la herramienta de roscado. El contorno interior especial de la tuerca de sujeción permite un desmontaje rápido y sencillo de la pinza y la herramienta de roscado. Las tuercas de sujeción BASS son adecuadas para refrigeración interna y se pueden utilizar con discos de sellado o de refrigeración.

Angaben in U/min / values in rpm / rotations en trs/min / dati in rpm / valores en rpm

**Drehzahl**

$$n = \frac{v_c \cdot 1000}{\pi \cdot d_1}$$

number of revolutions (rpm)  
vitesse de rotation  
numero di giri

**Schnittgeschwindigkeit**

$$v_c = \frac{n \cdot \pi \cdot d_1}{1000}$$

cutting speed  
vitesse de coupe  
calcolo della velocità di taglio

**Gewindebohrer, Gewindefurcher**

cutting taps, roll taps / tarauds machine, tarauds à refouler /  
 maschi a macchina, maschi a rullare / machos de roscado a máquina, laminadores

## Kegel-Hohlschaft mit Plananlage (HSK) für Werkzeugmaschinen

hollow taper shank with flange contact surface (HSK) for machine tools / attachement HSK avec centrage sur cone et appui sur collerette / accoppiamento cono rasamento (HSK) / cono hueco poligonal con plano (HSK) para máquinas herramientas

Mitnehmernuten am Kegelumende. Zentrale Kühlschmierstoffzufuhr. Einsatz bei Hochgeschwindigkeitszerspanung. Kraftschlüssige Drehmomentübertragung über Kegel und Anlagefläche oder über Mitnehmernuten am Schaftende. Hohe Steifigkeit durch die Abstützung am Bund.

Drive keys at the end of HSK taper. Central coolant supply. Use in high speed cutting. Nonpositive torque transmission through taper and flange contact surface or through the drive keys at the end of the HSK taper. High rigidity due to face contact between flange and spindle. /

Pièces de liaison en bout du cone HSK. Lubrification interne. Utilisation à haute vitesse. Transmission du couple uniquement par serrage sur cone / collerette ou positivement par les pièces de liaison en bout du cone. Attachement robuste grâce à l'appui de la collerette sur la broche de la machine. /

Scanalatura di trascinamento. Adduzione del lubrificante. Lavorazione ad alta velocità. Trasmissione momento torcente con cono e trascinatori, o cono e scanalature di trascinamento. Alta rigidità grazie al bloccaggio cono - rasamento. /

Ranuras de arrastre al cono (HSK). Alimentación de refrigerante central. Uso en mecanizado de alta velocidad. Transmisión del par por arrastre de fuerza a través de cono y plano o a través las ranuras de arrastre al cono. Alta rigidez por medio de apoyo del cono.

The tap has to be kept in the compression area of the tap holder.</p> <p>a) Nächst größeres Gewindeschneidfutter verwenden.<br/>b) Mit Steigungsführung arbeiten.<br/>c) Gewindebohrer mit verbesserten Führungseigenschaften verwenden.</p> <p>a) Use the next larger tap holder.<br/>b) Work with pitch control.<br/>c) Use a machine tap with improved guiding characteristics.</p> |

**Gewindeschneiden / Tapping**

**Gewinde wird zu eng / Internal thread is too tight (undersize)**

**Ursache / Cause**

Toleranzangabe auf dem Gewindebohrer ist nicht identisch mit Toleranzangabe auf der Zeichnung oder der Gewindelehre.

Tolerance of the tap is not identical with tolerances stated on the drawing or gauge.

Falscher Gewindebohrer, Schneidengeometrie des Gewindebohrers ist für den Anwendungsfall ungeeignet.

Wrong type of tap, cutting geometry is not suitable for the application.

**Abhilfe / How to help**

Den für die gewünschte Toleranz entsprechenden Gewindebohrer verwenden.

Use a tap with correct tolerance field.

Gewindebohrer für die zu zerspanende Werkstoffgruppe einsetzen.

Use taps that are suitable for the application / material group to be machined.

**Gewinde wird scheinbar zu eng / Internal thread seems to be too tight**

**Ursache / Cause**

Der Gewindebohrer schneidet nicht steigungsge-  
nau (Gewinde-Gut-Lehrdorn lässt sich nicht voll  
einschrauben).

The tap does not cut within its own pitch (go-gauge  
cannot be screwed in completely).

**Abhilfe / How to help**

- a) Siehe Gruppe „Axial verschnittene Gewinde“.
- b) Zu hohe Axialkräfte während des Schneidvorganges vermeiden.
- c) Gewindeschneidfutter mit Längenausgleich einsetzen.
- d) Spanstauung vermeiden.

- a) See „How to help“ “Threads with axial miscut”.
- b) Avoid high axial forces during tapping.
- c) Use a tap holder with length compensation.
- d) Avoid chip jams.

**Gewinde hat Vorweite / No-go gauge can be entered deeper than allowed**

**Ursache / Cause**

Es wurde mit falschem Anschnittdruck geschnitten.  
Axial schwergängige Arbeitsspindel.

Tap starts cutting with the wrong cutting pressure /  
axially rough-running machine spindle.

Winkel- oder Positionsfehler zur Gewindekernbohrung.

Error in angle or position of the bore hole.

**Abhilfe / How to help**

- a) Mit Steigungsführung arbeiten.
- b) Gewindeschneidfutter mit Längenausgleich einsetzen.

- a) Cut with automatic feed.
- b) Use a tap holder with length compensation.

Auf korrekte Werkstückspannung achten. Eventuell  
Gewindeschneidfutter mit achsparalleler Pendelung  
verwenden.

Pay attention to correct workpiece clamping. Possi-  
ble use of a tap holder with radial parallel floating.

Gewindeschneiden / Tapping

Unsaubere Gewindeoberfläche / Rough thread surface

|                                                                                     | Compacted wall of the bore hole through used tools               | Re-sharpen and change the boring tool in time.         |

**Gewindeschneiden / Tapping**

**Standweg zu gering / Tool life too low**

**Ursache / Cause**

- Vergütete oder gehärtete Bauteile.
- Heat-treated or hardened components.
- Werkstückwerkstoff hat sich in der Bearbeitung verändert (Zähigkeit, Härte).
- Material characteristics of the workpiece have changed (toughness, hardness).
- Gewinde-Kernlochbohrung zu klein vorgebohrt.
- Bore hole is too small.

**Abhilfe / How to help**

- Wenn möglich Vergütung und / oder Oberflächenbehandlung erst nach dem Gewindeschneiden durchführen.
- If possible carry out heat and surface treatment after tapping.
- Werkzeuggeometrie an neue Gegebenheiten anpassen.
- Adjust the geometry of the tap to the new machining conditions.
- Kernloch-Ø nach DIN 336 bzw. jeweiliger Norm beachten. Siehe Bohrlochtafel auf Seite 194.
- Consider bore hole Ø according to DIN 336 or respective standard. Bore hole Ø see page 194.

**Werkzeugteilausbrüche oder Werkzeuggewaltbruch im Vor- bzw. Rücklauf  
Tooth breakage or breakage of the tap in forward or reverse motion**

**Ursache / Cause**

- Spanstauungen / Späneklebmer
- Chip jams / clamped chips
- Überlastung der Anschnittzähne.
- Overstress of the chamfer teeth
- Winkel- oder Positionsfehler der Gewinde-Kernlochbohrung.
- Error in angle or position of the bore hole.
- Fehlende oder falsche Ansenkung.
- Missing or wrong countersink.
- Auflaufen des Gewindebohrers auf Kernlochgrund.
- Tap hitting the bottom of the bore hole.
- Härte des Werkzeugs für das Bearbeitungsproblem nicht optimal. / Schneidengeometrie des Gewindebohrers für den Bearbeitungsfall ungeeignet.
- Hardness of tool is not optimal for the application. / Cutting geometry of the tap is not suitable for the application.

**Abhilfe / How to help**

- a) Gewindeboher mit anderer Nutform einsetzen.
- b) Gewindeboher mit Oberflächenbehandlung / Beschichtung einsetzen.
- c) Entspänen.
- a) Use a tap with a different flute form.
- b) Use a tap with surface treatment / coating.
- c) Interrupt the cutting operation to remove the chips, then finish the thread.
- a) Längerer Anschnitt (Bohrungsform beachten, Grund- oder Durchgangsgewinde)
- b) Anzahl der Anschnittzähne durch höhere Anzahl der Spannuten vergrößern.
- a) Longer chamfer (pay attention to the hole type: blind / through).
- b) Increase the number of chamfer teeth by increasing the number of flutes.
- a) Auf korrekte Werkstückspannung achten.
- b) Schneidfutter mit achsparalleler Pendelung verwenden.
- a) Pay attention to correct workpiece clamping.
- b) Use a tap holder with radial parallel floating.
- Ansenken der Gewinde-Kernbohrung in ausreichender Größe (min. 1,05 x Nenndurchmesser).
- Countersink the bore hole in the correct size (min. 1.05 x nominal diameter).
- a) Bohrungstiefe prüfen.
- b) Gewindeboher mit kürzerem Anschnitt wählen.
- c) Mit Steigungsführung arbeiten.
- a) Check hole depth.
- b) Choose a tap with shorter chamfer.
- c) Cut with pitch control.
- Für den Bearbeitungsfall geeigneten Gewindeboher verwenden.
- Choose a suitable tool.

**Gewindefurchen / Thread Roll Forming**

**Gewinde zu wenig ausgeformt (Kern-Ø ist zu groß)  
Internal thread is not formed completely (core Ø too big)**

| Ursache / Cause                                                                                | Abhilfe / How to help                                                                                                                                              |
|------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Vorbohrdurchmesser ist zu groß.<br>Bore hole diameter is too big.                              | Vorbohrdurchmesser verkleinern.<br>Reduce the bore hole diameter.                                                                                                  |
| Werkstoffbruchdehnung im Grenzbereich < 8%.<br>Material elongation is in the limit range < 8%. | Vorbohrdurchmesser verkleinern, Sonderfurcher mit spezieller Geometrie verwenden.<br>Reduce the bore hole diameter, use a special roll tap with specific geometry. |

**Gewinde zu stark ausgeformt (Kern-Ø ist zu klein)  
Thread is "over-formed" (core-Ø is too small)**

| Ursache / Cause                                                                              | Abhilfe / How to help                                              |
|----------------------------------------------------------------------------------------------|--------------------------------------------------------------------|
| Vorbohrdurchmesser ist zu klein.<br>Bore hole diameter is too small.                         | Vorbohrdurchmesser vergrößern.<br>Increase the bore hole diameter. |
| Winkel- oder Positionsfehler der Vorbohrung.<br>Error in angle or position of the bore hole. | Werkstückspannung optimieren.<br>Optimize the workpiece clamping.  |

**Unsaubere Gewindeoberfläche / ausgerissene Gewinde  
Rough thread surface / Stripped thread**

| Ursache / Cause                                                                                                | Abhilfe / How to help                                                                                                                                                                                                                                                                                        |
|----------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Schmierung unzureichend.<br>Insufficient lubrication.                                                          | a) Fettgehalt vom Kühlschmierstoff erhöhen, Schneidöl verwenden.<br>b) Furcher mit Ölnuten einsetzen.<br>c) Furcher mit innerer Kühlmittelzufuhr verwenden.<br>a) Increase oil content of the lubricant, use cutting oil.<br>b) Use a roll tap with oil grooves.<br>c) Use a roll tap with internal coolant. |
| Kaltaufschweißungen oder Werkstoffanklebung am Furcher.<br>Cold welding or material adhesions at the roll tap. | Für den Einsatzfall geeignete Beschichtung wählen.<br>Select suitable coating for the application.                                                                                                                                                                                                           |
| Werkzeug hat Verschleiß.<br>Tool is worn.                                                                      | Furcher austauschen.<br>Change the roll tap.                                                                                                                                                                                                                                                                 |

**Gewindefurchen / Thread Roll Forming**

**Standweg zu gering / Tool life too low**

**Taraudage coupant / Maschi a tagliare**

**Taraudage trop grand / Filetto troppo largo**

**Cause / Causa**

Lubrification insuffisante ou lubrifiant inadapté. Il y a des métallisations/collages.

Insufficiente composizione di lubrificazione e (o) adduzione. Ci sono delle saldature a freddo o incollature.

Le choix de la classe de tolérance du taraud n'est pas conforme au plan ou au tampon de contrôle.

L'indicazione della tolleranza sul maschio non è identica all'indicazione sul disegno o calibro.

**Remède / Soluzione**

Vérifier si la lubrification est correcte : nature du lubrifiant, débit, position des buses.

Garantire un'adeguata e sufficiente lubrificazione.

Choisir un taraud conforme.

Utilizzare un maschio adeguato alla tolleranza richiesta.

**Taraudage avec profil déformé / Doppio taglio assiale**

**Cause / Causa**

Le taraud à fort angle d'hélice (type DOMINANT) est aspiré à cause d'une pression de coupe trop forte.

Maschi a forte torsione (tipo DOMINANT) vengono usati con una pressione d'inizio taglio troppo alta.

**Remède / Soluzione**

Réduire la pression à l'attaque du taraudage. Le taraud doit être retenu au démarrage par une traction du porte-taraud. Programmer une avance de 0,95xpas.

Applicare solo una leggera pressione assiale durante il taglio. Il maschio deve lavorare in trazione con maschiatori compensati. Ridurre l'avanzamento al 95%.

Le taraud à entrée Gun (type VARIANT) est repoussé à cause d'une pression de coupe trop faible.

Maschi con imbocco corretto (tipo VARIANT) ricevono una pressione d'inizio taglio troppo bassa.

Augmenter la pression à l'attaque du taraudage. Le taraud doit être poussé au démarrage par une compression du porte-taraud.

Applicare una forte pressione assiale durante il taglio quando si usano maschi con imbocco corretto o con un'elica sinistra. Il maschio deve lavorare in compressione con maschiatori compensati.

Le porte-taraud à compensation est inadapté ou la raideur des ressorts du porte-taraud à compensati-on n'est pas suffisante.

Lavorazione eseguita con mandrino a maschiare con compensazione inadatta o al limite della forza elastica.

- a) Utiliser un porte-taraud adapté.
- b) Programmer une avance rigoureusement égale au pas du taraud.
- c) Utiliser une machine synchrone.

- a) Utilizzare una grandezza superiore di maschiatore.
- b) Lavorare con corretto passo.
- c) Usare un maschio con migliori caratteristiche di guida.

Taradage coupant / Maschi a tagliare

**Le taradage est trop serré, trop petit / Filetto troppo stretto**

**Cause / Causa**

Le choix de la classe de tolérance du taraud n'est pas conforme au plan ou au tampon de contrôle.

L'indication della tolleranza sul maschio non è identica all'indicazione sul disegno o calibro.

Mauvais choix de la référence du taraud, la géométrie de coupe ne convient pas pour l'application.

Maschio sbagliato, la geometria di taglio del maschio non è adatta per l'applicazione.

**Remède / Soluzione**

Choisir un taraud conforme.

Utilizzare un maschio adeguato alla tolleranza richiesta.

Choisir un taraud adapté pour l'application / groupe matière.

Utilizzare un maschio adatto per il gruppo di materiale.

**Le taradage semble trop serré, trop petit / Filetto apparentemente troppo stretto**

**Cause / Causa**

Le taraud ne coupe pas selon son propre pas. (Le tampon „entre“ ne se visse pas complètement.)

Il maschio non taglia esattamente il passo corretto. (Il calibro passa non si avvita completamente.)

**Remède / Soluzione**

- a) Voir les remèdes de la rubrique „Taradage avec profil déformé“.
- b) Réduire les efforts axiaux de taradage.
- c) Utiliser un porte-taraud à compensation.
- d) Eviter les bourrages de copeaux.

- a) Vedi gruppo „Doppio taglio assiale“.
- b) Evitare troppa forza assiale durante il processo di taglio.
- c) Utilizzare un mandrino a maschiare con compensazione.
- d) Evitare un intasamento di truciolo.

**Le tampon fileté "n'entre pas" entre sur une profondeur trop importante / La parte iniziale del filetto è troppo larga**

**Cause / Causa**

La pression à l'attaque du taradage n'est pas correcte / Avance de la machine incorrecte ou mal programmée.

E stato tagliato con una pressione d'inizio taglio. Difficoltà assiale del mandrino di lavoro.

Mauvais alignement angulaire ou axial du taraud par rapport à l'avant-trou.

Errore dell'angolo o sbaglio di posizione del preforo.

**Remède / Soluzione**

- a) Tarauder avec une avance contrôlée.
- b) Utiliser un porte-taraud à compensation.

- a) Lavorare corretto passo.
- b) Utilizzare un mandrino a maschiare con compensazione.

Vérifier le positionnement de la pièce dans le montage. Utiliser un porte-taraud avec jeu radial.

Garantire una tenuta corretta del pezzo. Utilizzare un mandrino con oscillazione parallela all'asse.

**Mauvais état de surface des filets (rugosités, arrachements) / Superficie rovinata**

**Cause / Causa**

La référence du taraud n'est pas adaptée à l'application.

La geometria del filetto non è conforme.

Lubrification insuffisante ou lubrifiant inadapté.

Insufficiente composizione di lubrificazione e (o) adduzione.

**Remède / Soluzione**

Choisir un taraud adapté pour le groupe matière à tarauder.

Scegliere il maschio adatto per il materiale da lavorare.

Vérifier si la lubrification est correcte : nature du lubrifiant, débit, position des buses.

Garantire un'adeguata e sufficiente lubrificazione.

Taraudage coupant / Maschi a tagliare

**Gewindeschneiden**

**Aufbauschneide: Materialaufklebung an der Schneidkante**

**Ursache**

Kleinste Werkstoffteilchen werden schichtweise an der Schneidkante kaltverschweißt

**Abhilfe**

- a) Schnittgeschwindigkeit erhöhen
- b) Beschichtung anpassen
- c) Werkzeuggeometrie anpassen
- d) Kühlschmierung verbessern (höherer Ölgehalt, Werkzeug mit Innenkühlung)

**Ausbrüche: Ausbrüche an der Schneidkante**

**Ursache**

Probleme bei der Spanbildung und Spanabfuhr

**Abhilfe**

- a) Spanbildung und Spanförderung verbessern
- b) Werkzeug mit Innenkühlung verwenden
- c) Zäheren Grundwerkstoff wählen

**Freiflächenverschleiß: Abrieb der Freiflächen am Werkzeug**

**Ursache**

Reibung zwischen Werkstoff und Werkzeugfreifläche

**Abhilfe**

- a) Kühlschmierung verbessern (höherer Ölgehalt, Werkzeug mit Innenkühlung)
- b) Schnittgeschwindigkeit reduzieren
- c) Freiwinkel erhöhen
- d) Verschleißfesteren Grundwerkstoff oder Beschichtung wählen

**Kaltaufschweißungen: Kaltaufschweißungen an Span- oder Freiflächen**

**Ursache**

ungeeignete Werkzeugoberfläche für Werkstoff  
ungünstige Kühlschmierung

**Abhilfe**

- a) Beschichtung bzw. Oberfläche ändern
- b) Freiwinkel erhöhen
- c) Glattere Oberfläche / Beschichtung wählen
- d) Kühlschmierung verbessern (höherer Ölgehalt, Werkzeug mit Innenkühlung)
- e) Schnittgeschwindigkeit reduzieren

**Kolkverschleiß: Auswaschung, Aushöhlung der Spanflächen**

**Ursache**

Materialabtrag an der Spanfläche

**Abhilfe**

- a) Schnittgeschwindigkeit reduzieren
- b) Verschleißfesteren Grundwerkstoff wählen
- c) Verschleißfestere Beschichtung wählen
- d) Kühlschmierung verbessern (höherer Ölgehalt, Werkzeug mit Innenkühlung)

## Gewindefurchen

### Formkantenverschleiß: Abrieb der Polygonspitzen

#### Ursache

Abrasion zwischen Werkstoff und Polygonen

#### Abhilfe

- a) Kühlschmierung verbessern (höherer Ölgehalt, Werkzeug mit Innenkühlung)
- b) Schnittgeschwindigkeit reduzieren
- c) Beschichtung ändern
- d) Werkzeuggeometrie ändern

### Kaltaufschweißungen: Kaltaufschweißungen an Span- oder Freiflächen

#### Ursache

ungeeignete Werkzeugoberfläche für Werkstoff  
ungünstige Kühlschmierung

#### Abhilfe

- a) Kühlschmierung verbessern (höherer Ölgehalt, Werkzeug mit Innenkühlung)
- b) Schnittgeschwindigkeit reduzieren
- c) Beschichtung ändern
- d) Werkzeuggeometrie ändern

## Gewindefräsen

### Aufbauschneide: Materialaufklebung an der Schneidkante

#### Ursache

Kleinste Werkstoffteilchen werden schichtweise an der Schneidkante kaltverschweißt

#### Abhilfe

- a) Schnittgeschwindigkeit verringern bzw. Vorschub erhöhen
- b) Beschichtung anpassen
- c) Werkzeuggeometrie anpassen
- d) Kühlschmierung verbessern (höherer Ölgehalt, Werkzeug mit Innenkühlung)

### Ausbrüche: Ausbrüche an der Schneidkante

#### Ursache

Vibrationen und Spänestau

#### Abhilfe

- a) Spanabfuhr verbessern (Werkzeug mit Innenkühlung)
- b) Vibrationen reduzieren (Schnittgeschwindigkeit reduzieren, Vorschub erhöhen, Auskraglänge verkürzen, stabile Baumaße)
- c) Belastung der Schneidkanten verringern (Vorschub pro Zahn reduzieren, radiale Schnittaufteilung anwenden)
- d) Zäheren Schneidstoff verwenden
- e) Stabilere Werkzeuggeometrie verwenden

### Freiflächenverschleiß: Abrieb der Freiflächen am Werkzeug

#### Ursache

Reibung zwischen Werkstoff und Werkzeugfreifläche

#### Abhilfe

- a) Kühlschmierung verbessern (höherer Ölgehalt, Werkzeug mit Innenkühlung)
- b) Schnittgeschwindigkeit reduzieren bzw. Vorschub erhöhen
- c) Verschleißfesteren Grundwerkstoff wählen

**Thread cutting**

**Built-up edges: material adhesion at the cutting edge**

**Cause**

smallest particles of the material are cold-welded layer by layer at the cutting edge

**How to help**

- a) increase cutting speed
- b) adapt coating
- c) adapt tool geometry
- d) improve cooling (higher oil content, tool with internal coolant)

**Breakage: breakage at the cutting edge**

**Cause**

problems with chip forming and chip evacuation

**How to help**

- a) improve chip forming and chip evacuation
- b) use tools with internal coolant
- c) choose a tougher base material

**Wear of thread relief area: abrasion of the tool's thread relief area**

**Cause**

friction between material and the tool's relief area

**How to help**

- a) improve cooling (higher oil content, tool with internal coolant)
- b) reduce cutting speed
- c) increase clearance angle
- d) choose a more wear-resistant base material or coating

**Cold welds: cold welds at the cutting face or the thread relief area**

**Cause**

unsuitable tool surface for material  
unfavourable cooling lubrication

**How to help**

- a) change coating or surface
- b) increase clearance angle
- c) choose a smooth surface or coating
- d) improve cooling (higher oil content, tool with internal coolant)
- e) reduce cutting speed

**Crater wear: leaching, cavities of the cutting faces**

**Cause**

abrasion of material at the cutting face

**How to help**

- a) reduce cutting speed
- b) select a more wear-resistant base material
- c) select a more wear-resistant coating
- d) improve cooling (higher oil content, tool with internal coolant)

## Thread Roll Forming

### Wear of forming edge: abrasion of polygonal tips

**Cause**

abrasion between material and polygons

**How to help**

- a) improve cooling (higher oil content, tool with internal coolant)
- b) reduce cutting speed
- c) change coating
- d) change tool geometry

### Cold welds: cold welds on the polygons

**Cause**

unsuitable tool surface for material  
unfavourable cooling lubrication

**How to help**

- a) improve cooling (higher oil content, tool with internal coolant)
- b) reduce cutting speed
- c) change coating
- d) change tool geometry

## Thread Milling

### Built-up edge: material adhesion at the cutting edge

**Cause**

smallest particles of the material are cold-welded layer by layer at the cutting edge

**How to help**

- a) reduce cutting speed or increase feed
- b) adapt coating
- c) adapt tool geometry
- d) improve cooling (higher oil content, tool with internal coolant)

### Breakage: breakage at the cutting edge

**Cause**

vibrations and chip jam

**How to help**

- a) improve chip evacuation (tool with internal cooling)
- b) reduce vibrations (reduce cutting speed, increase feed, shorten projection length, stable dimensions)
- c) reduce pressure on the cutting edge (decrease feed per tooth, radial cut distribution)
- d) use a tougher tool material
- e) use a more solid tool geometry

### Wear of thread relief area: abrasion of the tool's thread relief area

**Cause**

friction between material and the tool's thread relief area

**How to help**

- a) improve cooling (higher oil content, tool with internal coolant)
- b) reduce cutting speed or increase feed
- c) select a more wear-resistant base material

**Taraudage coupant**

**Arête rapportée: Collage de matière sur l'arête de coupe**

**Cause**

De minuscules particules de matière se soudent par couches successives sur l'arête de coupe

**Solution**

- a) Augmenter la vitesse de coupe
- b) Choisir un revêtement adapté
- c) Choisir un taraud ayant une géométrie appropriée
- d) Améliorer la lubrification (plus forte teneur en huile, lubrification interne)

**Écaillages: Écaillages de l'arête de coupe**

**Cause**

Problèmes de formation et d'évacuation des copeaux

**Solution**

- a) Améliorer la formation et le transport des copeaux
- b) Utiliser un outil à lubrification interne
- c) Sélectionner une nuance d'outil à plus forte ténacité

**Usure en dépouille: Abrasion des faces de dépouille de l'outil**

**Cause**

Frottements entre pièce et dépouille

**Solution**

- a) Améliorer la lubrification (plus forte teneur en huile, outil à lubrification interne)
- b) Réduire la vitesse de coupe
- c) Augmenter l'angle de dépouille
- d) Sélectionner un revêtement ou une nuance d'outil plus résistante à l'usure

**Métallisation: Apparition de micro-soudures sur les faces de coupe et en dépouille**

**Cause**

Le traitement de surface de l'outil ne convient pas pour la matière à usiner  
Lubrification non appropriée

**Solution**

- a) Choisir un revêtement ou un traitement de surface approprié
- b) Augmenter l'angle de dépouille
- c) Sélectionner un revêtement ou une surface plus lisse
- d) Améliorer la lubrification (plus forte teneur en huile, outil à lubrification interne)
- e) Réduire la vitesse de coupe

**Usure en cratère: Érosion et cratérisation des faces de coupe**

**Cause**

Erosion de la face de coupe

**Solution**

- a) Réduire la vitesse de coupe
- b) Sélectionner une nuance d'outil plus résistante à l'usure
- c) Choisir un revêtement plus résistante à l'usure
- d) Améliorer la lubrification (plus forte teneur en huile, outil à lubrification interne)

**Taraudage par déformation**

**Usure du profil de déformation : Usure par abrasion du sommet des lobes**

**Cause**

Abrasion à l'interface matière / lobes

**Solution**

- a) Améliorer la lubrification (plus forte teneur en huile, outil à lubrification interne)
- b) Réduire la vitesse de coupe
- c) Choisir un revêtement approprié
- d) Sélectionner une géométrie d'outil adaptée

**Métallisation: Apparition de micro-soudures sur les lobes**

**Cause**

Le traitement de surface de l'outil ne convient pas pour la matière à usiner  
Lubrification non appropriée

**Solution**

- a) Améliorer la lubrification (plus forte teneur en huile, outil à lubrification interne)
- b) Réduire la vitesse de coupe
- c) Choisir un revêtement approprié
- d) Sélectionner une géométrie d'outil adaptée

**Fraisage de filets**

**Arête rapportée: Apparition de micro-soudures sur l'arête de coupe**

**Cause**

De minuscules particules de matière se soudent par couches successives sur l'arête de coupe

**Solution**

- a) Réduire la vitesse de coupe resp. augmenter l'avance
- b) Choisir un revêtement approprié
- c) Sélectionner une géométrie d'outil adaptée
- d) Améliorer la lubrification (plus forte teneur en huile, outil à lubrification interne)

**Écaillages: Écaillages de l'arête de coupe**

**Cause**

Vibrations et accumulation de copeaux

**Solution**

- a) Améliorer l'évacuation des copeaux (outil à lubrification interne)
- b) Réduire les vibrations (Réduire la vitesse de coupe, augmenter l'avance, réduire la longueur en saillie de l'outil, stabilité dimensionnelle)
- c) Réduire les efforts sur les arêtes de coupe (Réduire l'avance par dent, procéder par répartition de coupe radiale)
- d) Utiliser une nuance d'outil à plus forte ténacité
- e) Choisir une géométrie plus robuste

**Usure en dépouille: Abrasion des faces de dépouille de l'outil**

**Cause**

Frottements entre la pièce et la dépouille de l'outil

**Solution**

- a) Améliorer la lubrification (plus forte teneur en huile, outil à lubrification interne)
- b) Réduire la vitesse de coupe resp. augmenter l'avance
- c) Choisir une nuance d'outil plus résistante à l'usure

**Maschiatura**

**Tagliente di riporto: Materiale incollato sul tagliente**

**Causa**

Piccole particelle di materiale sono saldate a freddo strato dopo strato sul tagliente

**Rimedio**

- a) Aumentare la velocità di taglio
- b) Personalizzare il rivestimento
- c) Personalizzare la geometria del maschio
- d) Migliorare la lubrificazione di raffreddamento (maggiore contenuto di olio, maschio con raffreddamento interno)

**Scheggiature: Scheggiature sul tagliente**

**Causa**

Problemi con la formazione e rimozione del truciolo

**Rimedio**

- a) Migliorare la formazione e la rimozione del truciolo
- b) Utilizzare il maschio con raffreddamento interno
- c) Scegliere materiale di base più tenace

**Usura delle superfici libere: Abrasioni delle superfici libere sul maschio**

**Causa**

Attrito tra materiali e superfici libere del maschio

**Rimedio**

- a) Migliorare la lubrificazione di raffreddamento (maggiore contenuto di olio, maschio con raffreddamento interno)
- b) Ridurre la velocità di taglio
- c) Aumentare l'angolo di spoglia
- d) Selezionare un materiale di base o un rivestimento più resistente all'usura

**Saldature a freddo: Saldature a freddo su trucioli o superfici libere**

**Causa**

Superfici del maschio inadatte a quel materiale  
Lubrificazione di raffreddamento non ottimale

**Rimedio**

- a) Cambiare rivestimento o superficie
- b) Aumentare l'angolo di spoglia
- c) Selezionare una superficie o un rivestimento più liscio
- d) Migliorare la lubrificazione di raffreddamento (maggiore contenuto di olio, maschio con raffreddamento interno)
- e) Ridurre la velocità di taglio

**Craterizzazione: Cavitazione, erosione delle superfici del truciolo**

**Causa**

Rimozione del materiale sulla superficie di taglio

**Rimedio**

- a) Ridurre la velocità di taglio
- b) Selezionare un materiale di base più resistente all'usura
- c) Selezionare un rivestimento più resistente all'usura
- d) Migliorare la lubrificazione di raffreddamento (maggiore contenuto di olio, maschio con raffreddamento interno)

**Maschi a rullare**

**Usura forma contorno: Abrasione delle punte del poligono**

**Causa**

Abrasione tra materiale e poligoni

**Rimedio**

- a) Migliorare la lubrificazione di raffreddamento (maggiore contenuto di olio, maschio con raffreddamento interno)
- b) Ridurre la velocità di taglio
- c) Cambiare rivestimento
- d) Modificare la geometria del maschio

**Saldature a freddo: Saldatura a freddo sui poligoni**

**Causa**

Superficie del maschio inadatta a quel materiale  
Lubrificazione di raffreddamento non ottimale

**Rimedio**

- a) Migliorare la lubrificazione di raffreddamento (maggiore contenuto di olio, maschio con raffreddamento interno)
- b) Ridurre la velocità di taglio
- c) Cambiare rivestimento
- d) Modificare la geometria del maschio

**Fresatura**

**Tagliente di riporto: Materiale incollato sul tagliente**

**Causa**

Piccole particelle di materiale sono saldate a freddo strato dopo strato sul tagliente

**Rimedio**

- a) Ridurre la velocità di taglio o aumentare la velocità di avanzamento
- b) Regolare il rivestimento
- c) Regolare la geometria del maschio
- d) Migliorare la lubrificazione di raffreddamento (maggiore contenuto di olio, maschio con raffreddamento interno)

**Scheggiature: Scheggiature sul tagliente**

**Causa**

Vibrazione e accumulo di trucioli

**Rimedio**

- a) Migliorare la rimozione del truciolo ( maschio con raffreddamento interno)
- b) Ridurre le vibrazioni (ridurre la velocità di taglio, aumentare la velocità di avanzamento, accorciare la lunghezza di proiezione, dimensioni stabili)
- c) Ridurre il carico sui taglienti (ridurre l'avanzamento per dente, applicare la divisione taglio radiale)
- d) Utilizzare materiale da taglio più duro
- e) Utilizzare una stabile geometria del maschio

**Usura delle superfici libere: Abrasioni delle superfici libere sul maschio**

**Causa**

Attrito tra materiale e superficie libera del maschio

**Rimedio**

- a) Migliorare la lubrificazione di raffreddamento (maggiore contenuto di olio, maschio con raffreddamento interno)
- b) Ridurre la velocità di taglio o aumentare la velocità di avanzamento
- c) Selezionare un materiale di base più resistente all'usura

**Roscado**

**Re-crecimiento del filo: Material adherido en el filo de corte**

**Causa**

Las partículas pequeñas se sueldan en frío capa por capa en el filo de corte

**Solución**

- a) Incrementar la velocidad de corte
- b) Adaptar el recubrimiento
- c) Adaptar geometría de la herramienta
- d) Mejorar el refrigerante (Aumentar la concentración de aceite, herramienta con refrigeración interior)

**Rotura: Rotura en el filo de corte**

**Causa**

Problemas con la formación y/o evacuación de la viruta

**Solución**

- a) Mejorar la formación de viruta y la evacuación de viruta
- b) Usar herramientas con refrigeración interior
- c) Usar un material más tenaz

**Desgaste en la incidencia del macho: Abrasión en la incidencia del macho**

**Causa**

Rozamiento entre el material de corte y el lado de incidencia del macho

**Solución**

- a) Mejorar refrigerante (Aumentar la concentración de aceite, herramienta con refrigeración interior)
- b) Reducir la velocidad de corte
- c) Incrementar el ángulo de desprendimiento
- d) Elegir un material de corte o un recubrimiento más resistente al desgaste

**Soldaduras en frío: Soldaduras en frío en la cara de corte o en el área de incidencia**

**Causa**

Superficie de la herramienta inadecuada.  
Lubricación inadecuada

**Solución**

- a) Cambiar recubrimiento o la superficie
- b) Incrementar ángulo de desprendimiento
- c) Elegir una superficie o un recubrimiento más liso
- d) Mejorar refrigerante (Aumentar la concentración de aceite, herramienta con refrigeración interior)
- e) Reducir la velocidad de corte

**Craterización: Cavidades en la cara de desprendimiento**

**Causa**

Abrasión del material en la cara de corte

**Solución**

- a) Reducir la velocidad de corte
- b) Seleccionar un material de Hta más resistente al desgaste
- c) Seleccionar un recubrimiento más resistente al desgaste
- d) Mejorar refrigerante (Aumentar la concentración de aceite, herramienta con refrigeración interior)

## Roscado por laminación

### Deformación del filo: Abrasión de las puntas poligonales

**Causa**

Abrasión entre el material de corte y filos poligonales

**Solución**

- a) Mejorar refrigerante (Aumentar la concentración de aceite, herramienta con refrigeración interior)
- b) Reducir la velocidad de corte
- c) Cambiar recubrimiento
- d) Cambiar la geometría de la herramienta

### Soldaduras en frío: Soldaduras en frío en los filos poligonales

**Causa**

Superficie de la hta inadecuada para el material  
Lubricación inadecuada

**Solución**

- a) Mejorar refrigerante (Aumentando la concentración de aceite, herramienta con refrigeración interior)
- b) Reducir la velocidad de corte
- c) Cambiar recubrimiento.
- d) Cambiar geometría de la herramienta

## Roscado por interpolación

### Re-crecimiento del filo: Material adherido en el filo de corte

**Causa**

Las partículas pequeñas se sueldan en frío capa por capa en el filo de corte

**Solución**

- a) Reducir le velocidad de corte e incrementar el avance
- b) Adaptar el recubrimiento
- c) Adaptar la geometría de la herramienta
- d) Mejorar refrigerante (Aumentando la concentración de aceite, herramienta con refrigeración interior)

### Rotura: Rotura en el filo de corte

**Causa**

Vibraciones y atasco de viruta

**Solución**

- a) Mejorar la evacuación de viruta (hta con refrigeración interior)
- b) Reducir vibraciones (Reducir velocidad de corte y aumentar el paso, acortar longitud de hta, dimensiones estables)
- c) Reducir la presión en el filo de corte (disminuir el avance por diente, distribución de corte radial)
- d) Usar un material más tenaz
- e) Usar una hta más sólida

### Desgaste en la incidencia de la fresa: Abrasión en la incidencia de la fresa

**Causa**

Rozamiento entre el material de corte y el lado de incidencia de la fresa

**Solución**

- a) Mejorar la evacuación de viruta (hta con refrigeración interior)
- b) Reducir la velocidad de corte o aumentar el avance
- c) Seleccionar un material de hta más resistente al desgaste

## I. Allgemeines

1. Allen Lieferungen und Leistungen der BASS GmbH – im Folgenden kurz BASS genannt – liegen deutsches Recht zugrunde sowie die folgenden BVB oder etwaige gesonderte vertragliche Vereinbarungen. Abweichende Einkaufsbedingungen des Käufers erkennen wir nicht an und werden auch durch Auftragsannahme nicht Vertragsinhalt, es sei denn, wir hätten ausdrücklich schriftlich ihrer Geltung zugestimmt.

2. Unsere Verkaufsbedingungen gelten auch für alle unsere zukünftigen Geschäfte mit dem Besteller.

3. Sollten einzelne Bestimmungen dieser Bedingungen unwirksam sein oder werden, so wird dadurch die Gültigkeit der übrigen Bestimmungen nicht berührt.

## II. Angebot und Lieferung

1. Unsere Angebote sind freibleibend. Mündliche Absprachen mit unseren Reisenden, Vertretern oder Beauftragten bedürfen unserer schriftlichen Bestätigung. Wurde eine solche nicht erteilt, gilt unsere Lieferausführung bzw. der Lieferschein als Auftragsbestätigung. Nach der Erteilung der Auftragsbestätigung ist eine Lösung des Käufers vom Liefervertrag in der Regel ausgeschlossen.

2. An unsere Angebote halten wir uns 90 Tage sofern nicht anders vereinbart.

3. Die in unseren Katalogen, Prospekten, Preislisten oder Voranschlägen und sonstigen Unterlagen genannten Maße, Zeichnungen, Gewichte, Abbildungen, Beschreibungen und sonstigen Angaben sind nur annähernd maßgebend, soweit sie nicht ausdrücklich als verbindlich bezeichnet sind. Der Besteller übernimmt für die von ihm beizubringenden Unterlagen wie Zeichnungen, Lehren, Muster, oder dgl. die alleinige Verantwortung. Der Besteller hat dafür einzustehen, dass von ihm vorgelegte Ausführungszeichnungen in Schutzrechte Dritter nicht eingreifen.

4. Muster werden nur gegen Berechnung geliefert.

5. Kostenvoranschläge sind unverbindlich und – soweit nicht anders ausdrücklich vereinbart – kostenpflichtig.

6. Für den Umfang der Leistung ist unsere schriftliche Auftragsbestätigung maßgebend. Wir sind zu Teilleistungen berechtigt, soweit sie für den Käufer zumutbar sind. Werden Sonderwerkzeuge in Auftrag gegeben, so darf die Bestellmenge um ca. 10% mindestens jedoch um 2 Stück über- oder unterschritten werden. Berechnet wird die Liefermenge.

7. Die Lieferfristen gelten nur annähernd, wenn sie nicht ausdrücklich schriftlich als verbindlich zugesagt wurden. Bei Lieferterminangaben nach Kalenderwochen gilt jeweils der letzte Arbeitstag. Die Lieferfrist beginnt mit der Absendung unserer Auftragsbestätigung, jedoch nicht vor Klärung aller für die Durchführung des Auftrags erforderlichen technischen und kaufmännischen Fragen bzw. der Beibringung der von dem Käufer seinerseits zu erbringenden Vorleistungen z.B. Beibringung behördlicher Bescheinigungen oder Genehmigungen bzw. vor Eingang einer vom Käufer zu erbringenden Anzahlung. Dies gilt nicht, soweit wir die Verzögerung zu vertreten haben. Sofern wir den Käufer gegen Vorauskasse beliefern, beginnt die angegebene Lieferfrist erst mit dem Eingang des Vorauskassetrages. Nachträglich vom Käufer gewünschte Änderungen haben eine Unterbrechung der Lieferzeit zur Folge. Nach Verständigung über die gewünschte Änderung beginnt die Lieferfrist erneut zu laufen.

8. Die Lieferfrist ist eingehalten, wenn bis zu ihrem Ablauf der Leistungsgegenstand unser Werk verlassen hat oder unsere Lieferbereitschaft mitgeteilt ist und die Ware ohne unser Verschulden nicht rechtzeitig abgesandt werden kann.

9. Liefer- und Leistungsverzögerungen aufgrund von höherer Gewalt und aufgrund von Ereignissen, deren Ursachen sich außerhalb unseres Einwirkungsbereiches befinden, berechtigen uns, die Lieferung bzw. die Leistung um die Dauer der Behinderung zuzüglich einer angemessenen Anlaufzeit hin-auszuschleichen. Dies gilt auch, wenn solche Ereignisse bei unseren Zulieferern oder während eines bereits vorliegenden Verzugs eintreten. Wenn die Behinderung länger als 3 Monate dauert, ist der Käufer wie auch wir berechtigt, hinsichtlich des nicht erfüllten Teils vom Vertrag zurück zu treten. Beginn und Ende solcher Hinderungsgründe teilen wir dem Käufer baldmöglichst mit.

10. Der Käufer kann ohne Fristsetzung vom Vertrag zurücktreten, wenn uns die gesamte Lieferung vor Gefahrübergang unmöglich wird. Der Käufer kann darüber hinaus vom Vertrag zurücktreten, wenn bei einer Bestellung die Ausführung eines Teils der Lieferung unmöglich wird und er ein berechtigtes Interesse hat an der Ablehnung der Teillieferung. Ist dies nicht der Fall, so hat der Käufer den auf die Teillieferung entfallenden Vertragspreis zu zahlen. Tritt die Unmöglichkeit oder das Unvermögen während des Annahmeverzugs ein oder ist der Käufer für diese Umstände allein oder weit überwiegend verantwortlich, bleibt er zur Gegenleistung verpflichtet.

11. Für den Fall, dass der Käufer mit der Bezahlung früherer Lieferungen aus laufender Geschäftsverbindung in Verzug ist, sind wir berechtigt, von einer weiteren Belieferung abzusehen, wobei die dem Käufer entstehenden Kosten zu seinen Lasten gehen.

12. Bestellungen auf Abruf müssen spätestens 12 Monate nach Bestelleingang abgerufen sein sofern nicht anders vereinbart. Nach Ablauf dieser Frist haben wir das Recht, die bestellte Ware zum Versand zu bringen. Kommt der Käufer in Annahmeverzug oder verletzt er sonstige Mitwirkungspflichten, so sind wir berechtigt, für den uns entstandenen Schaden Ersatz zu verlangen. Weitergehende Ansprüche bleiben vorbehalten.

## III. Preis und Zahlung

1. Alle Preise sind in € (Euro) und gelten mangels besonderer Vereinbarung ab Werk einschließlich Verladung ab Werk, jedoch ausschließlich Verpackung, Zoll, Versicherung, Versandkosten und Entladung. Zu den Preisen kommt die Umsatzsteuer in der jeweiligen gesetzlichen Höhe hinzu.

2. Die gesetzliche Mehrwertsteuer ist nicht in unserem Preis eingeschlossen; sie wird in gesetzlicher Höhe am Tag der Rechnungsstellung in der Rechnung gesondert ausgewiesen.

3. Der Mindestbestellwert beträgt 100,00 € sofern nicht anders vereinbart. Ggf. kann für Bestellungen unter diesem Wert eine Bearbeitungsgebühr von 20,00 € berechnet werden. Wenn möglich sind Sammellieferungen durchzuführen.

4. Bei Kostensenkung oder -erhöhung durch Materialpreis bzw. durch Lohnerhöhungen, behalten wir uns vor, den zum Zeitpunkt der Lieferung maßgeblichen Preis zu berechnen, falls die Auslieferung später als 4 Monate nach dem Datum unserer Auftragsbestätigung erfolgt. Die Kostenänderungen werden wir dem Käufer auf Verlangen nachweisen.

5. Für jede einzelne Bestellung oder Spezifikation wird die Lieferzeit gesondert vereinbart.

6. Eine Neuberechnung in einer für den Käufer zumutbaren Weise behalten wir uns auch für den Fall vor, dass der Vertragsgegenstand mit technischen Verbesserungen gegenüber dem Vertragszeitpunkt versehen wurde.

7. Bei nicht vereinbarten Mindermengen sind wir berechtigt, kostendeckende Zuschläge zu erheben bzw. Rabattkürzungen vorzunehmen.

8. Unsere Rechnungen sind innerhalb von 14 Tagen ab Rechnungsdatum ohne jeden Abzug zahlbar sofern nicht anders vereinbart.

9. Bei Zahlungsverzug werden Zinsen in Höhe von 8 Prozentpunkten jährlich über dem jeweiligen Basiszinssatz (§247 BGB) fällig. Der Nachweis eines weitergehenden Verzugs-schadens bleibt vorbehalten.

10. Das Recht, Zahlungen zurück zu halten oder mit Gegenansprüchen aufzurechnen, steht dem Käufer nur insoweit zu, als seine Gegenansprüche schriftlich unbestritten oder rechts-kräftig festgestellt sind.

11. Wechsel nehmen wir nur aufgrund vorhergehender schriftlicher Vereinbarung an, die Gutschrift erfolgt nur erfüllungshalber. Die mit der Wechselzahlung anfallenden Kosten gehen zu Lasten des Käufers.

12. Wir sind nach erfolglosem Ablauf einer angemessenen Nachfrist berechtigt, ausstehende und zukünftige Leistungen nur gegen Vorauskasse durchzuführen oder von der Stellung der Sicherheit abhängig zu machen, wenn der Käufer mit vereinbarten Zahlungszielen in Verzug ist oder Umstände vorliegen, die bei Anlegung banküblicher Maßstäbe Zweifel an der Zahlungsfähigkeit des Käufers begründen. Zudem sind wir berechtigt, unsere Forderungen, unabhängig von der Laufzeit etwaiger Wechsel, fällig zu stellen und Sicherheiten zu verlangen.

13. Sogenannte Garantie- und Gewährleistungsansprüche des Käufers, die im Voraus beansprucht werden, sind ausgeschlossen.

14. Angestellte, Reisende oder Vertreter unseres Hauses haben keine Inkassovollmacht, es sei denn, dass hierfür unser ausdrücklicher, schriftlicher Auftrag vorliegt.

15. Wir behalten uns vor, Gutschriften nicht auszusahlen, sondern dem Kundenkonto gutzuschreiben.

## IV. Verpackung und Versand

1. Die Verpackung erfolgt nach handelsüblichen Gesichtspunkten und nach unserem Ermessen. Es handelt sich um Einwegverpackungen, die billigst berechnet und nicht zurückgenommen werden. Mehrwegverpackungssysteme sind zwischen dem Käufer und uns abzustimmen.

2. Wir bemühen uns um den aus unserer Sicht bestmöglichen Versandweg, sofern nicht eine bestimmte Versandart vereinbart wurde. Sollten durch eine vom Käufer vorgeschriebene Versandart Mehrkosten entstehen, so hat diese der Käufer zu tragen.

3. Unsere Lieferungen erfolgen ab Werk, ausschließlich Verpackung. Die Kosten für Verpackung und für die Überbringung ab Werk bis zum Lieferort trägt der Käufer.

4. Sofern der Besteller es wünscht, werden wir die Lieferung durch eine Transportversicherung absichern; die insoweit anfallenden Kosten trägt der Besteller.

## V. Gefahrübergang

1. Die Gefahr geht auf den Besteller über, wenn der Liefergegenstand das Werk oder Lager verlassen hat und zwar auch dann, wenn Teillieferungen erfolgen oder wir noch andere Leistungen, z. B. Verladung, Transport oder Entladung übernommen haben.

2. Verzögert sich die Leistung infolge von Umständen, die der Käufer zu vertreten hat, geht die Preisgefahr am Tag der Mitteilung der Lieferbereitschaft auf ihn über. Wir sind in diesem Fall berechtigt, die Ware auf Kosten und Gefahr des Käufers nach eigenem Ermessen zu lagern und als ab Werk geliefert zu berechnen. Auf Verlangen des Käufers versichern wir die jeweilige Sendung auf seine Kosten gegen Diebstahl, Bruch-, Transport-, Feuer- und Wasserschäden.

## VI. Eigentumsvorbehalt

1. Die gelieferte Ware bleibt bis zur Erfüllung unserer sämtlichen Forderungen aus der Geschäftsverbindung in unserem Eigentum. Dies gilt auch für die Erteilung des Saldo-Anerkenntnisses.

2. Der Käufer ist berechtigt, die gelieferte Ware im ordnungsgemäßen Geschäftsverkehr weiter zu veräußern, wenn er schon jetzt die entstehenden Forderungen gegen seinen Abnehmer zur Sicherung der Höhe unserer Forderung abtritt. Bei der Veräußerung von Waren, an denen wir anteiliges Eigentum haben, gilt die Vorausabtretung anteilig in Höhe des Rechnungswertes unserer Vorbehaltsware. Der Käufer hat uns auf Verlangen sämtliche Auskünfte zu erteilen und Einsicht in die Unterlagen zu gewähren.

3. Die Ware bleibt bis zur vollständigen Bezahlung unser Eigentum und wir werden im Falle der Verarbeitung oder Umbildung Hersteller und im Falle der Verbindung mit anderen Sachen Miteigentümer und zwar anteilig nach dem Rechnungswert der Vorbehaltsware. Die neue Sache wird vom Käufer unentgeltlich für uns verwahrt.

4. Wenn der Wert der bestehenden Sicherheiten die zu sichernden Forderungen um mehr als 20% übersteigt, sind wir auf Verlangen des Käufers insoweit zur Freigabe verpflichtet.

5. Zu anderen Verfügungen über die Vorbehaltsware (Verpfändungen, Sicherungsübergaben) oder anderen Abtretungen der genannten Forderungen (siehe Eigentumsvorbehalt 2. und 3.) ist der Käufer nicht berechtigt. Im Falle von Pfändungen oder Beschlagnahmen der Vorbehaltsware hat der Käufer auf unser Eigentum hinzuweisen und uns unverzüglich zu benachrichtigen.

6. Ist der Käufer in Zahlungsverzug oder sind unsere Forderungen durch Verschlechterung der Kreditwürdigkeit des Käufers gefährdet, sind wir nach erfolglosem Ablauf einer von uns gesetzten Nachfrist auch dann zur Aufforderung einer sofortigen Zahlung oder zur Rücknahme der Vorbehaltsware berechtigt, wenn wir nicht vom Vertrag zurückgetreten sind. Wir sind dann auch berechtigt, die Vorbehaltsware freihändig zu verkaufen oder versteigern zu lassen. Für unsere Ausfallforderung haftet der Käufer.

7. Solange uns das Eigentum an unseren Lieferungen vorbehalten bleibt, hat der Käufer die ihm erfolglosem Erzeugnisse auf seine Kosten ausreichend gegen Verlust durch Diebstahl, Bruch, Feuer, Wasser und für sonstige Schäden zu versichern und uns solche Versicherungen auf Anforderung nachzuweisen.

## VII. Mängelansprüche

Für Sach- und Rechtsmängel der Lieferung haftet BASS unter Ausschluss weiterer Ansprüche – vorbehaltlich Abschnitt VIII – wie folgt:

### Sachmängel

1. Alle diejenigen Teile sind unentgeltlich nach Wahl des Käufers nachzubessern oder mangelfrei zu ersetzen, die sich infolge eines vor dem Gefahrübergang liegenden Umstandes als mangelhaft herausstellen. Die Feststellung solcher Mängel ist BASS unverzüglich schriftlich zu melden.

2. Bei offensichtlicher Mangelhaftigkeit oder Unvollständigkeit der Ware sind uns die Beanstandungen innerhalb von 2 Wochen nach Ankunft der Leistung am Bestimmungsort schriftlich unter genauer Bezeichnung des Fehlers und der Rechnungsnummer anzuzeigen. Sonstige Mängel sind uns unverzüglich, spätestens innerhalb einer Woche seit Kenntniserlangung, anzuzeigen. Auf unsere Aufforderung sind Belege, Muster, Packzettel und/oder die fehlerhafte Ware an uns zurückzusenden. Ansprüche des Käufers wegen Mangelhaftigkeit oder Unvollständigkeit der Leistung sind ausgeschlossen, wenn er dieser Verpflichtung nicht nachkommt.

3. Zur Vornahme aller seitens BASS notwendigen erscheinenden Nachbesserungen und Ersatzlieferungen hat der Käufer nach Verständigung mit BASS die erforderliche Zeit und Gelegenheit zu geben; anderenfalls ist BASS von der Haftung für die daraus entstehenden Folgen befreit. Nur in dringenden Fällen der Gefährdung der Betriebssicherheit bzw. zur Abwehr un-verhältnismäßig großer Schäden, wobei BASS sofort zu verständigen ist, hat der Besteller das Recht, den Mangel selbst oder durch Dritte beseitigen zu lassen und vom Lieferer Ersatz der erforderlichen Aufwendungen zu verlangen. Ersetzte Teile werden Eigentum von BASS.

4. Gewährleistungsansprüche des Käufers setzen voraus, dass er seinen gesetzlichen Untersuchungs- und Rügepflichten ordnungsgemäß und unverzüglich nachgekommen ist. Kommt der Käufer dieser Verpflichtung nicht nach, hat er keine Mängelansprüche gegen uns. Der Käufer hat zudem Beweise in geeigneter, detaillierter Form zu sichern, die die Fehlerhaftigkeit von BASS Produkten schlüssig beweisen. Er hat über sein QM-System umfassend Auskunft zu geben und uns auf Verlangen Gelegenheit zur Überprüfung zu geben.

5. Wir sind berechtigt, Nacherfüllung nach unserer Wahl vorzunehmen. Dies bedeutet, dass wir entscheiden dürfen, ob eine Mangelbeseitigung oder eine Neulieferung vorgenommen wird. Schlägt die Nacherfüllung fehl, sind wir zu einer wiederholten Nacherfüllung berechtigt. Auch im Falle einer wiederholten Nacherfüllung entscheiden wir zwischen Neulieferung oder Mangelbeseitigung.

6. Der Besteller ist erst dann zum Rücktritt vom Vertrag und/oder zur Geltendmachung von Schadensersatz berechtigt, wenn die Nacherfüllung zweimal fehlgeschlagen ist.

7. Der Kunde ist insbesondere verpflichtet, die Qualität, die mithilfe von BASS Werkzeugen gefertigt wird, durch geeignete Maßnahmen entsprechend der QM-Norm IATF 16949 oder vergleichbaren Regelwerken (VDA 6.1, VDA 6.4) abzusichern. Er ist verpflichtet, regelmäßig durch Zufühnahme geeichter Prüfmittel die produzierte Qualität zu prüfen und bei Abweichungen dies umfassend und sorgfältig zu dokumentieren. Er ist ausnahmslos für die Qualität der mit BASS Werkzeugen produzierten Teile verantwortlich, auch wenn wir ihm Unterstützung anbieten oder auch leisten. Pauschale Kundenanforderungen an die Firma BASS – im speziellen auch an die Qualität unserer Produkte, die z.B. in den Einkaufsbedingungen unserer Kunden definiert sind – erkennen wir nicht an.

8. Keine Haftung wird insbesondere in folgenden Fällen übernommen: Ungeeignete oder unsachgemäße Verwendung, fehlerhafte Montage bzw. Inbetriebsetzung durch den Käufer oder Dritte, natürliche Abnutzung, fehlerhafte oder nachlässige Behandlung, nicht ordnungsgemäße Wartung, ungeeignete Betriebsmittel, Schäden aufgrund höherer Gewalt oder besondere Einflüsse, die nicht im Vertrag vereinbart sind, chemische, elektrochemische oder elektrische Einflüsse oder Nichterfüllung von unter VII 4 aufgeführten Käuferpflichten – sofern sie nicht von BASS zu verantworten sind.

9. Geringfügige Fehler, die weder den Wert noch die Tauglichkeit oder die Verwendbarkeit des Werkes wesentlich beeinträchtigen, sind von der Gewährleistung ausgeschlossen.

10. Bessert der Käufer oder ein Dritter unsachgemäß nach, besteht keine Haftung seitens BASS für die daraus entstehenden Folgen. Gleiches gilt für ohne vorherige Zustimmung seitens BASS vorgenommene Änderungen des Liefergegenstandes.

11. Von den durch die Nachbesserung bzw. Ersatzlieferung entstehenden unmittelbaren Kosten tragen wir – soweit sich die Beanstandung als berechtigt herausstellt – die Kosten des Ersatzstückes einschließlich des Versandes.

12. Hinsichtlich etwaiger Ersatzansprüche und Nachbesserungsarbeiten gilt eine Ge-

währleistungsfrist von 12 Monaten ab Lieferung.

13. Rückgriffsansprüche des Bestellers gegen uns bestehen nur insoweit, als der Besteller mit seinem Abnehmer keine über die gesetzlichen Mängelansprüche hinausgehenden Vereinbarungen, z.B. Kulanzregelungen, getroffen hat.

14. Nicht von uns autorisierte Werbeaussagen des Käufers gegenüber seinen Käufern oder in seinen Werbematerialien begründen keine Mängelansprüche gegen uns.

#### Rechtsmängel

15. Unsere in Abschnitt VII. genannten Verpflichtungen sind vorbehaltlich Abschnitt IX. 2 für den Fall der Schutz- oder Urheberrechtsverletzung abschließend.

Sie bestehen nur, wenn

- der Käufer uns in angemessenem Umfang bei der Abwehr der geltend gemachten Ansprüche unterstützt bzw. uns die Durchführung der Modifizierungsmaßnahmen gemäß die-se-n Bedingungen ermöglicht,
- uns alle Abwehrmaßnahmen einschließlich außergerichtlicher Regelungen vorbehalten bleiben,
- der Rechtsmangel nicht auf einer Anweisung des Käufers beruht und
- die Rechtsverletzung nicht dadurch verursacht wurde, dass der Käufer den Liefergegenstand eigenmächtig geändert oder in einer nicht vertragsgemäßen Weise verwendet hat.

16. Soweit nicht anders vereinbart, begrenzt sich unsere Verpflichtung zur Lieferung frei von gewerblichen Schutzrechten und Urheberrechten („Schutzrechte“) Dritter auf das Land des Lieferortes.

17. Für Ansprüche, die sich aus der Verletzung von gewerblichen Schutzrechten oder Urheberrechten Dritter ergeben, haften wir nicht, wenn das Schutzrecht im Eigentum des Bestellers bzw. eines unmittelbarer oder mittelbarer mehrheitlich kapital- oder stimmrechtsmäßig ihm gehörenden Unternehmens (verbundenes Unternehmen) gem. §15 AktG steht oder stand. Unsere Haftung ist auch ausgeschlossen, wenn der Liefergegenstand bzw. die Fertigung des Liefergegenstandes auf der Basis spezieller Vorgaben des Kunden, z.B. nach dessen Zeichnungen, entstanden ist.

18. Für Ansprüche, die sich aus der Verletzung von Schutzrechten ergeben, haften wir nicht, wenn nicht mindestens ein Schutzrecht aus der Schutzrechtsfamilie entweder von Euro-päischen Patentamt oder in einem der Staaten Bundesrepublik Deutschland, Frankreich, Großbritannien, Österreich oder USA veröffentlicht ist. Die Veröffentlichung der Schutzrechte muss spätestens zum Zeitpunkt der Lieferung erfolgt sein. Eine Haftung wird ausgeschlossen, wenn wir den Kunden auf bestimmte existierende Schutzrechte hinweisen und dieser ungeachtet der Schutzrechtslage auf eine Bestellung/Auslieferung besteht.

19. Führt die Benutzung des Liefergegenstandes zur Verletzung von Schutzrechten, sind wir verpflichtet, dem Besteller das Recht zum weiteren Gebrauch zu verschaffen oder den Liefergegenstand in für den Besteller zumutbarer Weise derart zu modifizieren, dass die Schutzrechtsverletzung nicht mehr besteht. Ist dies zu wirtschaftlich angemessenen Bedingungen und in angemessener Frist nicht möglich, sind wir zum Rücktritt vom Vertrag berechtigt.

20. Der Besteller ist verpflichtet, uns über die von Dritten geltend gemachten Ansprüche unverzüglich schriftlich zu informieren. Er räumt uns zudem die Gelegenheit ein, uns in angemessener Zeit mit den Dritten in Verhandlung zur gütlichen Beilegung möglicher Rechtsstreitigkeiten einzutreten.

#### VIII. Retouren

1. Retouren oder Umtausch sind nur inner-

halb von 30 Tagen nach Lieferung und vorheriger Absprache mit uns, mit einer Einlagegebühr von 20%, möglich. Retouren oder Umtausch werden nur bei lagerhaltigen Standardprodukten im Neuzustand und originalverpackt akzeptiert.

2. Die Stornierung von Sonderwerkzeugen kann nur durch Abgabe einer ausdrücklichen Erklärung und mit Zustimmung von BASS erfolgen. Die Höhe der Stornogebühr richtet sich nach Höhe der Rechnungssumme und Zeitpunkt des Zugangs der Stornoerklärung.

#### IX. Haftung des Lieferers, Haftungsaus-schluss

1. Wenn der Liefergegenstand durch unser Verschulden infolge unterlassener oder fehlerhafter Ausführung von vor oder nach Vertragsschluss erfolgten Vorschlägen und Beratungen oder durch die Verletzung anderer vertraglicher Nebenverpflichtungen – insbesondere Anleitung für Bedienung, Prüfung und Wartung der Werkzeuge und der bearbeiteten Werkstücke – vom Käufer nicht vertragsgemäß verwendet werden kann, so gelten unter Ausschluss weiterer Ansprüche des Bestellers die Regelungen der Abschnitte VII und IX. 2.

2. Für Schäden, die nicht am Liefergegenstand selbst entstanden sind, haften wir – aus welchen Rechtsgründen auch immer – nur

- a) bei Vorsatz,
- b) bei grober Fahrlässigkeit des Inhabers/der Organe oder leitender Angestellter,
- c) bei schuldhafter Verletzung von Leben, Körper, Gesundheit,
- d) bei Mängeln, die er arglistig verschwiegen hat,
- e) im Rahmen einer Garantiezusage,
- f) bei Mängeln des Liefergegenstandes, soweit nach Produkt-haftungsgesetz für Personen- oder Sachschäden an privat genutzten Gegenständen gehaftet wird.

Bei schuldhafter Verletzung wesentlicher Vertragspflichten haften wir auch bei grober Fahrlässigkeit nicht leitender Angestellter und bei leichter Fahrlässigkeit, in letzterem Fall be-grenzt auf den vertragstypischen, vernünftigerweise vorher-sehbaren Schaden. Weitere Ansprüche sind ausgeschlossen.

3. Die vorstehenden Haftungsbeschränkungen gelten nach Grund und Höhe auch zugunsten unserer gesetzlichen Vertreter, Mitarbeiter, und sonstigen Erfüllungs- und Verrichtungsgehilfen.

#### X. Urheberrecht/ Geheimhaltung

Wir behalten uns Urheberrechte und das Recht zur Anmeldung gewerblicher Schutzrechte, wie z.B. Patente, vor an Abbildungen, Mustern, Kostenvoranschlägen, Zeichnungen, u.ä. Informationen körperlicher oder unkörperlicher Art – auch in elektronischer Form. Sie dürfen ohne unsere Zustimmung Dritten nicht zugänglich gemacht werden und dürfen im eigenen Betrieb des Bestellers nur solchen Personen zur Verfügung gestellt werden, die für deren Verwendung notwendigerweise herangezogen werden müssen und die ebenfalls zur Geheimhaltung verpflichtet sind; sie bleiben unser ausschließliches Eigentum. Ohne unser vorheriges schriftliches Einverständnis dürfen solche Informationen nicht vervielfältigt oder gewerbsmäßig verwendet werden. Auf Verlangen sind sie unverzüglich herauszugeben.

#### XI. Exportkontrolle

1. Die Lieferungen und Leistungen (Vertragserfüllung) stehen unter dem Vorbehalt, dass der Erfüllung keine Hindernisse aufgrund von nationalen oder internationalen Exportkontrollbestimmungen, insbesondere Embargos oder sonstigen Sanktionen entgegenstehen. Der Besteller verpflichtet sich, alle Informationen und Unterlagen beizubringen, die für die Ausfuhr oder Verbringung benötigt werden. Verzögerungen aufgrund von Exportprüfungen oder Genehmigungsverfahren setzen Fristen und Lieferzeiten außer Kraft. Werden erforderliche Genehmigungen nicht erteilt,

bzw. ist die Lieferung und Leistung nicht genehmigungsfähig, gilt der Vertrag bezüglich der betroffenen Teile als nicht geschlossen.

2. Wir sind berechtigt, den Vertrag fristlos zu kündigen, wenn die Kündigung für uns erforderlich ist zur Einhaltung nationaler oder internationaler Rechtsvorschriften. In diesem Fall ist die Geltendmachung eines Schadens oder die Geltendmachung anderer Rechte durch den Besteller wegen der Kündigung ausgeschlossen.

#### XII. Softwarenutzung

1. Soweit im Lieferumfang Software enthalten ist, wird dem Käufer ein nicht ausschließliches Recht eingeräumt, die gelieferte Software einschließlich ihrer Dokumentation zu nutzen. Sie wird zur Verwendung auf dem dafür bestimmten Liefergegenstand überlassen. Eine Nutzung der Software auf mehr als einem System ist untersagt.

2. Der Käufer darf die Software nur im gesetzlich zulässigen Umfang (§§ 69a ff. UrhG) vervielfältigen, überarbeiten, übersetzen oder von dem Objektcode in den Quellcode umwandeln. Der Käufer verpflichtet sich, Herstellerangaben – insbesondere Copyright-Vermerke – nicht zu entfernen oder ohne unsere vorherige ausdrückliche Zustimmung zu verändern.

3. Alle sonstigen Rechte an der Software und den Dokumentationen einschließlich Kopien bleiben bei uns bzw. beim Softwarelieferanten. Die Vergabe von Unterlizenzen ist unzulässig.

#### XIII. Rechtswahl, Gerichtsstand und Erfüllungsort

1. Für alle sich aus dem Vertragsverhältnis ergebenden Streitigkeiten ist, wenn der Käufer Kaufmann, eine juristische Person des öffentlichen Rechts oder ein öffentlich-rechtliches Sondervermögen ist oder im Inland keinen allgemeinen Gerichtsstand hat, als Gerichtsstand der Ort des Werkes vereinbart, auch für Wechsel-, Urkunds- und Scheckverfahren. Wir sind jedoch berechtigt, den Käufer auch in seinem allgemeinem Gerichtsstand zu verklagen.

2. Es gilt ausnahmslos das für die Rechtsbeziehung inländischer Vertragspartner maßgebliche Recht der Bundesrepublik Deutschland; die Anwendung von UN-Kaufrecht über den internationalen Warenkauf (CISG) wird hiermit ausgeschlossen.

3. Erfüllungsort ist der Ort des Werkes.
