Dear customer,

Quality is our most important goal! Your satisfaction is our leading incentive to make a good solution an even better one.

But this is only possible with the continuous development and improvement of existing processes. The sheer diversity of our tooling requires a constant observation and evaluation of our product portfolio. As we strive to fine tune and perfect our solutions, it is possible that we adapt the tooling offering as described in our sales materials and possibly discontinue certain tooling. In such a case, our “on site” expert tooling consultants will offer you a more innovated or at very least, an efficient alternative with equal applicational performance.

We rely on, and are thankful for your understanding, that because of our continuous innovation and development, products currently offered in our product portfolio quite possibly could be adapted and or removed even though they still exist in our sales materials. For this reason, we are unable to undertake any obligations to deliver products affected from such changes, but in return, we obligate ourselves to always provide you with tooling conform with the latest technologies ensuring maximum production, profitability, and satisfaction.
